Dear NHVDL Clients,

We hope that 2020 will be a healthy year for you and your patients. Thank you for the opportunity to meet your diagnostic needs.

A lot has happened in the seven years since our last fee schedule update. We built a brand new state of the art facility and we have made major investments in technologies such as MALDI-TOF mass spectroscopy and other equipment throughout the lab. These improvements significantly enhance capabilities, and are necessary to ensure quality and rapid turn around times.

Additionally we have invested in highly skilled staff to expand the expertise, reliability and customer service that our clients have appreciated for over 50 years.

In order to keep up with rising costs and to continue our forward momentum, it is necessary to implement a small increase in prices, effective March 15, 2020. In addition to the updated pricing, we have also taken the opportunity to restructure and better define the testing options to help guide your test orders. Our pricing remains straightforward with no additional fees.

Affordability is an important part of diagnostic stewardship in order to protect animal and human health. Whether it be a necropsy or antibiotic susceptibility, we try to keep our services in reach for your clients.

Thank you to all of our current clients for your continued patronage. If you do not currently use the NHVDL, give us a call and set up an account today. Your support helps to advance our mission and bolster the animal health infrastructure in our region.

We would love to hear any suggestions you might have on how we can better serve you. If you are ever in the area, and have not had a chance to see our lab, please stop by for a tour, it would be great to see you.

Kind Regards,

Robert Gibson
Managing Director
NH Veterinary Diagnostic Laboratory
